## SPECIALS

R2#2 GROOVE WITH ME 2U

R3#6 MINT COLLECTOR 3.33U

R4#3 CLONMEL 2.63U

R6#5 ALTA STELLA 1.67U

RACE 1 2,1,3,4

## JAGARNA

Comes through an incredibly slow run race 14/5 and rated below previously achieved 3/5 figure. Steps up to this trip for the first time and is the potential leader in another slow run event.

## BEACH GOD

On the 7-day back-up and hit a new career peak. This is his third run in as many weeks and unclear where he maps up to this trip. Potentially could be an odds-on chance on performances and this isn't a strong race.

RACE 2 2,12,4,1

## **GROOVE WITH ME**

Gets the addition of a tongue tie and comes through a race 13/5 over the border that has produced two subsequent provincial winners in stronger company than this. Could potentially lead and fitter for three run this campaign.

## **MAN OF IRON**

Could potentially get a gun run up on speed in a slow run race. Resumed on a wet track (my data rated the 21/5 a 9 not a 7 as given) and stuck on, should be further improved.

## **SCOTTISH THREAD**

Three-year-old tackling the older horses. Started in the market on debut 21/5 and wasn't beaten far around here. Should be further improved. Would prefer she settle closer in the run up to this trip as this race lacks speed.

## **RACE 3**

**6,3,1,5**

## **MINT COLLECTOR**

Could end up the leader in a slow run race and showed improvement second-up running +4.5L above par standard, a new career peak. If able to hit a similar rating in this event could have as short as odds on.

## **RACE 4**

**3,9,2,10**

## **CLONMEL**

Returned close to career peak 21/5 when ran +4.0L above par off a fast +7.4L lead speed when resuming for new stable. Would like to see him produce it again as obviously has had issues, figure was too good to ignore and this is a winnable race.

## **RACE 5**

**14,3,4,2**

### **GANGSTERS RUN**

On 7-day back-up and comes through a stronger race 24/5. Ran to a comparable figure 10/5 and has hit winnable ratings when up in trip last campaign.

### **CENTENARY SHOT**

Suited by the good predicted tempo and fitter for two runs back this preparation. Showed improvement last start and better suited this trip. Form in the South-East and over the border lines up.

### **BON ELISE**

Up in grade and hit a great figure 24/5 off hot +11.5L lead speed, I do have a concern as to the validity of the figure as many horses hit new peaks. She is deep into a preparation and has been a costly conveyance. Suited by a fast race speed I have evaluated her on one of her median runs and with the addition of blinkers I'm prepared to be on her.

## **RACE 6**

**5,3,7,6**

### **CAPTURED**

Market lead all important as she resumes for new in-form stable. Showed good form in NSW before form tapered off towards the end of last preparation. Difficult to rate as hasn't stepped out in a recent public trial but invariably this stable improve tried horses.

### **ALTA STELLA**

Resumed 17/5 and ran to a huge figure, +5.0L above par standard. The race was run under a +1.2L lead speed and she ran home +6.7L above par, I race has already produced a place getter out of last week's Morphetville program. Looks to have scope for further improvement.

### **HOT DEMAND**

Resumed 17/5 and ran to a career peak figure in a race the field ran home in +5.1L closing sectionals. Should settle off speed again and has the home track advantage.

### **RACE 7**

**6,7,8,10**

### **MULLINGER LANE**

Raced against strong company 29/4, recording a good rating after racing on speed off a +4.5L lead speed. Disappointed 17/5, but the form out of the event has been ok to date with Grand Armada running a placing last week.

### **JUST LIVE ON**

Fitter for three runs back and is likely to settle handy off a fast speed. Has shown improvement at each run this campaign and

best figures win this race. Should settle handy and has raced well around here.

### **LUCKY FLIPPER**

Trained here and is possessed with natural speed. Placed over this trip 10/5 and has a high probability of hitting the required rating again.

### **GARGAMEL**

Should be forward in a fast run race. Shown huge improvement at past three starts and made a particularly big leap at latest run, showing +3.6L closing sectionals off a +2.7L lead speed. On this run rates as a chance in an open race.

### **RACE 8**

**1,5,6,11**

### **GRUMPY GURU**

Ran to one of his best figures two runs back 18/2 off a fast +6.7L lead tempo in an event that's produced two subsequent metro winners. Is resuming and was a winner first-up (off a very long break) around this track 7/12. Does possess tactical speed.

### **MARCO POLO**

Rated to high levels 1/4 & 25/3 but figures have rapidly declined at past three performances and is deep into a preparation. Likely to settle handy and does has the ability to figure it is difficult to rate him at the upper end of his ratings scale.

## **LOKTIN**

Comes through above average run races at past three starts and has rated to an adequate level, enough to be competitive here. Has tactical speed and there has already been a winner out of the Wodonga race.
